Risk Summary

The Bus Factor measures how many contributors your project critically depends on. A Bus Factor of 1 means if one key person becomes unavailable, critical parts of the codebase may become very difficult to maintain or debug.

✓ No critical Bus Factor risks detected.

No single contributor accounts for 80% or more of total commits. The codebase appears to have healthy knowledge distribution.

Overall Health Assessment

Status: Healthy

The top contributor owns 7.2% of commits across 204 contributors. Knowledge appears well distributed across the team.
